That means there needs to be great investment in an infrastructure to transport the energy from the place of generation to the place of consumption if we are to use wind power as a major power source. Even in a paper in Scientific American hypothesized that soon, fossil fuels would run out leaving solar power our only option 6. Solar energy can be used directly to heat water or spaces a greenhouse, for example.

Two new bills could put the Prairie State on the path to 100 percent renewable energy. It is really a no-brainer, if you take away all the ideological debris and lobbying. Often subject to campaigns to have them shut down or planning permission refused, to many they are a blot on the landscape that ruins a perfectly attractive natural view.

The expansion in renewables is also happening at scales large and small, from on CRC Press.
